wiegert & bähr
Turbines and Hydraulic Steel Structures

Wiegert & Bähr

is a high performance industrial enterprise, enhanced by the experience of more than 5 decades of manufacturing turbines and small hydro power stations. W&B is your experienced and reliable partner for state of the art hydropower design, for modernising as well as for service and repair.

Small enough to be flexible and quick, big enough to cover the full range of hydropower stations.

At a glance:

- Family owned
- 50 employees
- 50 years and more in the market
- Own design department
- 2,900 sqm manufacturing area
- German manufacturing
- Own erection staff
- DIN / ISO 9001 certifications
- Individual solutions for each customer

looking forward
to your call

W&B experience
and innovation power
- your head start
in hydraulic structures!

HYDRAULIC STEEL STRUCTURES

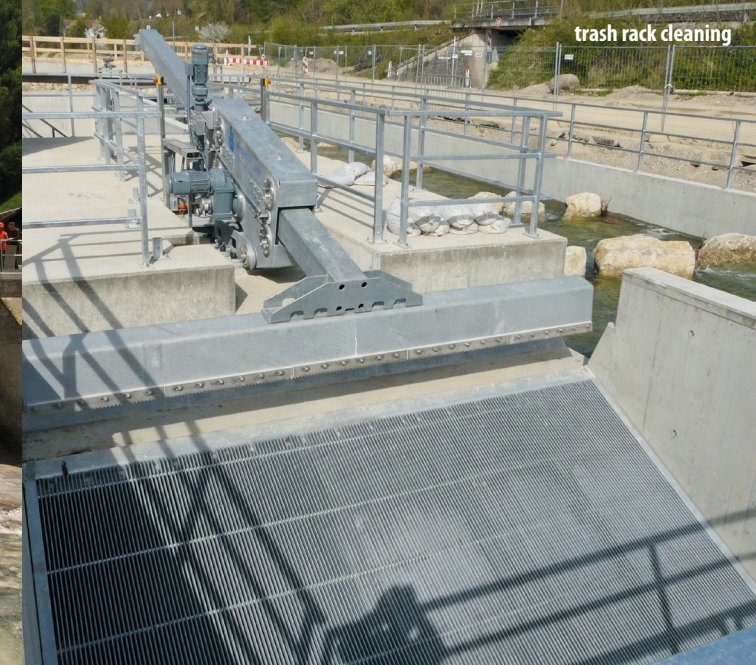

W&B product range

Trashracks:

- Intake racks (hydraulic profile)
- Coarse screens
- Tooth-rod trashrack cleaners (electro-mechanical drive)
- Telescopic trashrack cleaners (electro-hydraulic drive)
- Folding arm trashrack cleaners (hydraulic drive)
- Moving trashrack cleaners
- Horizontal trashrack cleaners

Hydraulic Steel Structures:

- Roller and sliding lock gates
- Flap gates with hydraulic or rope drive
- Stop logs and emergency logs
- Special design structures

Experienced staff for all individual manufacturing steps from the first layout to the final commissioned installation. New solutions from the market are incorporated e.g. frequency controlled drive systems as well as enhanced environmental regulations such as a maximising fish protection.

Wiegert & Bähr
- Hydropower technology
that pays off!
